Omouna ghassoul

Beauty with Purpose

By choosing this product, you're not just caring for your skin, you're supporting a women's cooperative in Morocco, helping women earn their own income.

The production process is traditional; everything is handmade. This ensures high product quality and respects the women who contribute their knowledge and expertise.

Omouna also donates a portion of its profit to the Centre Fiers et Forts in Tamesloht, located near Marrakech. This children's home provides shelter and intensive guidance to underprivileged and street children, giving them the opportunity for a better future.

Omouna Herbal Ghassoul is a 100% natural, ethically made product that pampers and nourishes your skin and senses.

Indulge in the ultimate self-care with Omouna Herbal Ghassoul while making a real difference in the lives of women and children.

Omouna ghassoul

Lava clay with herbs

Body wraps
Face and hair masks

Skincare and phyto-aromatherapy

The effectiveness of ghassoul is based on its ability to absorb impurities while releasing beneficial minerals.

It deeply cleanses and strengthens the skin thanks to its rich mineral content.

The mineral Hectorite absorbs four times more toxins than carbon does. The minerals Sodium, Calcium, Magnesium, Iron, Silicon and Montmorillonite help nourish and revitalise the skin. Ghassoul is pH-neutral and does not dry out the skin.

Traditionally, ghassoul has been the authentic skincare product used in hammams for centuries.

It is a gentle and cleansing alternative to soap, suitable even for sensitive skin, allergies and irritations.

Phyto-aromatherapy

By infusing fresh herbs and flowers, Omouna creates unique ghassoul blends, each offering distinct skin benefits and a rich aromatic experience.

What is Omouna ghassoul?

Formed 40 million years ago in Morocco, ghassoul is a lava clay created by underground volcanic eruptions. It is found deep beneath the Middle Atlas Mountains.

This mineral-rich clay is purer than surface clays, making it highly beneficial for skincare.

Omouna ghassoul is 100% pure and eco-friendly.

The herbs used are hand-picked from the mountains, where the air and soil are pristine. Then, they are carefully blended into the ghassoul while still fresh, preserving their natural properties.

A Traditional, Artisanal Process

No ovens but the sun that slowly dries the ghassoul. No machines but manual and attentive production to maintain its natural potency and fragrance.

Omouna Ghassoul contains only fresh lava clay with fresh herbs or flowers. Nothing else.

How to use

**Body wrap
face and hair mask**

Ghassoul chunks or powder

Gradually add hot water, stirring until absorbed. Continue adding water until you reach the desired consistency.

Ghassoul absorbs a lot of water and expands as a result.

When mixed with hot water, ghassoul transforms into a smooth, creamy paste, releasing the natural aroma of the herbs.

Detox bath

Ghassoul powder

Add the desired amount of ghassoul powder directly to bathwater. The more ghassoul you add, the stronger the effect and fragrance. Ghassoul rinses away easily and is completely safe for drainage systems.
